

I'm not robot!

The font size noted the former student of Auburn University Engineering Yogi Goswami, director of the Center for the University of South Florida and co-founder of the manufacturer of air purifiers from the Molekule Inc. industry, will speak via zoom for mechanical engineering students on solar photocatalysis, the underlying process in the patented photo of Molekule- Electrochemical Oxidation - or the PECO technology - an innovation that has become even more invaluable amid a viral pandemic.
À Á À Environmental applications of solar energy and other innovations, the Goswami seminar begins at 13h. CST is open to the public. To watch, visit . zoom.us/j/4465550646. While the HEPA filter technology, developed in the 1940s, remains suitable for capturing dust, mold, smoke and other large particles, smaller and pathogens pollutants, such as bacteria and viruses, can still undergo conventional air purifiers. Meanwhile, the professional-level purifier of Molekule, a rapidly growing favorite in medical facilities, actually meets food and medicine performance criteria for use not only in capture, but also destroying the SARS-Cov-2-the virus that causes covid-19 . Recently, laboratory tests conducted at the University of Minnesota determined that more than 99% of a SARS-CoV-2 substitute virus was inactivated after only a single passage through a Molekule Mini unit. "With other filtering devices, bacteria and viruses can remain viable in the filters and return to air, and the mold can continue to grow in the filter," Goswami said. But through PECO, Molekule destroys organic compounds at the molecular level so they are permanently time at Auburn.
éÁÁÁEven though this application isnéÁÁÁ powered by solar energy, it got started from solar,éÁÁÁ he said.
éÁÁÁAnd my initial interest in solar energy began at AuburnéÁÁÁéÁÁÁspecifically, outside of an Auburn gas station.
éÁÁÁI didnéÁÁÁt have a car, but in 1973 the oil embargo by the Arab oil-producing countries had the lines at some gas stations sometimes a mile long,éÁÁÁ Goswami said.
éÁÁÁCars were waiting for gas, running out of gas. So, with that in the background, I started thinking about éÁÁÁwhat is our future in terms of energy?éÁÁÁ Our professors at Auburn started looking into solar energy right around that time, and offered a course on solar energy. Just as I was about to finish my Ph.D., I took that course. I knew that was the area I wanted to pursue in the future.éÁÁÁ Goswami would go on to author more than 400 papers on renewable energy, literally writing the bookéÁÁÁand 21 moreéÁÁÁon the topic, with a special, thought-leading emphasis on solar. Since 2002, heéÁÁÁs also edited the peer-reviewed Solar Energy Journal. In 1993, while the director of the University of FloridaéÁÁÁs Solar Energy and Energy Conversion Laboratory, GoswamiéÁÁÁs successful efforts to decontaminate groundwater at Tyndall Air Force Base earned him international attention thanks to heavy news coverage by CNN and NBC News. The process that did the dirty work? Solar photocatalysiséÁÁÁthe éÁÁÁprecursor,éÁÁÁ as Goswami calls it, to PECO. In 2017, its first year on the market, Molekule made Time MagazineéÁÁÁs list of the yearéÁÁÁs best inventions. After that, it didnéÁÁÁt take long.
éÁÁÁI was watching the Today Show one day, and they showed a picture inside [host] Savannah GuthrieéÁÁÁs house,éÁÁÁ Goswami said.
éÁÁÁI told my wife,
éÁÁÁLook, thereéÁÁÁs a Molekule.éÁÁÁ
éÁÁÁAnd, then, there was the supermodel who talked about it. I canéÁÁÁt recall her name.éÁÁÁ That would be Kate Upton, who in 2019 sang the MolekuleéÁÁÁs praises to the Wall Street Journal. In her home with a new baby, she said, made her feel good. This made Chris Moody, the risk of the Foundry Group Risk Capital Company, to look like a good husband. Moody, a 1990 -degree graduated in Samuel Ginn College of Engineering of Auburn, was an initial investor in Molekule. "My wife, Sarah, is not very fond of new technologies and she tends to roll her eyes a little when I bring home new gadgets to test," Moody said.
à € øIn the last 25 years, she began to sniff around 5 am allergies. In that first morning with Molekule, she slept at 8 am f and smelled a morning from time. After a few days, she ordered more of our children's rooms. There are currently seven molekule units at Moodys' house.
€ áferences "I never knew someone who loves science more than yogi," said Moody. I think he will be better known for his work as an inventor and business for tremos of Molekule. He plans to tune in on Friday. And finding out layers that perhaps you have not recognized about yourself before. Being truly conscious is difficult to always be 100% accurate, personality tests work well as a starting point for self-discovery. Providing results that you may have not been completed on your own, you are, why do you make certain decisions, with whom Good or obtain some guidelines on possible career plans, take a look at the best free personality tests that see it. Briggs and her daughter, Isabel Briggs Myers. Initially inspired by JungéÁÁÁs personality theory, the Myers-Briggs test conveniently separates people into 16 categories of personalities, providing each person with a four-letter acronym. The following four tests are broad-stroke indicators of who you are, using inspiration from Myers-Briggs. Among other things, the tests cover your communication styles, your strengths and weaknesses, your desires and ambitions, how you see the world, and how people perceive you. If youéÁÁÁve never taken a test based off Carl Gustav JungéÁÁÁs psychological traits, or Myers-BriggséÁÁÁ 16 categories of personalities, IéÁÁÁd suggest you take at least one of these. YouéÁÁÁll be surprised by the accuracy of some of the statements, and more importantly, you could gain insight into how your behavior is perceived by others, helping you improve both professional and personal relationships.
1. 16 Personalities
16 Personalities covers five broad personality aspects: mind, energy, nature, tactics and identity. The test is based on Carl Gustav JungéÁÁÁs study of psychological traits (e.g. extroversion vs. introversion) and the Myers-Briggs test, two popular personality theories meant to determine an extensive overview of who you are. Among other things, the test will cover how you communicate and relate to others -- both professionally and personally -- what you value and strive for, and how you make decisions.
16 Personalities has been taken over 126 million times, and is available in 30 languages. Pros: Once you've gotten your results, you'll find extensive information on your personality type including strengths and weaknesses, relationships, friendships, parenthood, and workplace habits. The test is incredibly accurate and can tell you how your personality type plays out in specific situations.
À Á Cons: With seven bubbles varying from "Agree" to "Disagree", it can be difficult and time-consuming to outside where exactly you fall into every question.
A "totally agree", "I agree", "neutral", "disagree" and "I disagree totally" may have been more agile to answer. Best of all, learning how your personality type influences many different people from your life, as well as this affects your relationships, and intuition, thinking and feeling, judging and perceiving a four-letter abbreviation of your personality type (for example, € áferences "infp). The test provides a general view of how you connect with other people, how you behave and, perhaps the most surprising, as you are probably seen by others. Once. Once you know your abbreviation of four -letter personality, you can apply this roll to vain situations, such as work and love, and determine how others perceive their behaviors in these scenarios. Usually considered rude tendencies, and not rigorously classifications and many researchers say that myers-briggs tests are not scientific due to the different results you can get if you test twice. Interpret your behaviors and find out what you value the most.
3. Human Tricks
If you have never wondered which famous personalities share your personality type, you are lucky - human mother shows these information, along with your four -letter personality type (again, based on the theories of Jung and Myers-Briggs). With this test, you will gain information about which careers are best suited for your personality type. If you have trouble choosing a career or doubting what you have chosen, this test may help you discover.

If you are particularly particularly maybe youéÁÁÁve chosen a career path that enables you to work daily with large groups of people. If you have certain communication styles that rely on passivity and emotion, perhaps your bosséÁÁÁs direct statements sometimes offend you. Arming yourself with a sense of self-awareness could help you find your optimal career path, foster better work relationships, and mitigate work conflict more effectively. Here are four career-focused tests to help you achieve higher work satisfaction.
1. Crystal Crystal provides a free DISC assessment, which tells you (among other things) how your personality fits into your work environment, who you work well with, who you might have conflict with, how you perceive otheréÁÁÁs behaviors, and how otheréÁÁÁs perceive yours. The test helps you understand how your own personality biases you towards certain colleagues (i.e. your personality might take another coworkeréÁÁÁs comments offensively, while the coworker just believes in being direct), which could strengthen your work relationships. Best of all, Crystal also offers an accurate personality test, enabling you to build an extensive personality profile on one website. Plus, when you input your company, Crystal lets you see your colleagueéÁÁÁs personality profiles -- undeniably critical information when youéÁÁÁre looking to empathize with a coworker. coworker.
